

$L = 89$, $\alpha = 55/89$, $t_0 = 1$, $\Delta_0 = 0.5$, $V = 2.5$, $W = 0.01$, $A = B = 0.8$, $\theta = 0$, PBC

Exact Floquet: $M = 128$ midpoint slices. Folded selection: largest 20% of $|q_n|$, $q_n \in [-1/2, 1/2)$.

Kick-corrected states: $e^{-iK^{(1)}(0)}|\psi_n^{\mathrm{eff}}\rangle$. Panel (d): bare states selected by largest 20% of $|E_n^{\mathrm{eff}}/\omega|$.

Finite-size localization diagnostics; color scales are shared within each row.
