Drive frequency ω/t_0
Unfolded energy selection, bare states
Folded quasienergy selection, bare states
Folded quasienergy selection + kick
Static reference ω_{fold}
$L = 89$, $\alpha = 55/89$, $t_0 = 1$, $\Delta_0 = 0.5$, $V = 2.5$, $W = 0.01$, $A = B = 0.8$, $\theta = 0$, PBC
Unfolded: select largest 20% of $|E_n^{\mathrm{eff}}/\omega|$. Folded: select largest 20% of $|q_n^{\mathrm{eff}}|$.
Kick: use the same folded set after $e^{-iK^{(1)}(0)}$. Curves are methodological contrasts, not strictly additive physical corrections.
